### Хлопок в этом месяце

В сезоне 2021/22 года производство хлопка в мире готово к полному восстановлению после не оправдавшего ожиданий сезона 2020/21 года. По текущим оценкам объем мирового производства хлопка составляет 25,71 млн. тонн. Это на 6,01 % больше, чем в сезоне 2020/21 года, когда объем мирового производства хлопка составил 24,26 млн. тонн. За этот рост в значительной степени отвечают Соединенные Штаты, которые в настоящее время сообщают о производстве 3,91 млн. тонн хлопка, что указывает на увеличение объема производства хлопка на 739 000 тонн по сравнению с объемом производства в течение сезона 2020/21 года. Однако, в Бразилии и Пакистане, которые входят в список пяти стран - крупнейших производителей хлопка, в течение сезона 2020/21 года объем производства хлопка, как ожидается, увеличится, в то время как Китай и Индия сообщат о сокращении. Мировое производство все еще не полностью восстановилось до уровня, существовавшего до пандемии, но значительно восстановило утраченные позиции.

Production Change in '000 Metric Tonnes from 2020/21 to 2021/22

В Африке, особенно в Западной Африке (франкоязычная Африка), мы наблюдаем несколько другую ситуацию. Все западноафриканские страны сообщают об увеличении объема производства хлопка, причем при этом лидируют Бенин и Мали, в которых объем производства составляет 382 000 и 340 000 тонн хлопка соответственно. В Западной Африке объем производства вырос почти на 47,8 % по сравнению с производственными показателями сезона 2020/21 года. Бенин, Буркина-Фасо, Камерун, Чад, Кот-д'Ивуар, Мали, Сенегал и Того - все эти страны в настоящее время стремятся превзойти общий объем производства по сравнению с предыдущим годом. Хотя трудно сказать, сохранятся ли эти показатели производства или нет, но тот факт, что все западноафриканские страны сообщают о положительных цифрах, является обнадеживающим признаком для будущего хлопка в Африке.

Наибольший прирост объема производства хлопка наблюдается в Мали. Сокращение объема производства хлопка в Мали, которая является членом "хлопковой четверки" в течение 2020/21 года вызывало озабоченность в отношении африканского хлопка. В 2019/20 году Мали сообщила об общем объеме производстве хлопка в размере 284 тыс. тонн. В сезоне 2020/21 года Мали сообщила о производстве 63 тыс. тонн хлопка, что представляет собой значительное сокращение на 77,82% по сравнению с сезоном 2019/20 года. Эти потери были вызваны, в значительной степени, пандемией Ковид-19, которая бушевала как раз в то самое время, когда фермеры принимали решения о посевной кампании. В первом квартале 2020 года цены на хлопок снизились, и в результате цена производителя в Мали была снижена до 200 франков КФА (0,35 доллара США) за килограмм. Вместе с тем правительство Мали предоставило субсидию в размере 50 франков КФА за каждый килограмм произведенного хлопка-сырца, что повысило цену производителя до 250 франков КФА, которая тем не менее была ниже цены в 275 франков КФА в предыдущем сезоне. Это совпало с резким увеличением затрат на производственные нужды, и также привело к тому, что в течение сезона 2020/21 года хлопководы в Мали засеяли меньше гектаров хлопчатника. Согласно текущим оценкам в 2021/22 году в Мали будет засеяно 824,16 тыс. га, что является рекордным показателем за все время. Этот показатель, вероятно, будет пересмотрен, но по состоянию на июль 2021 года цена производителя в Мали составила 280 франков КФА (0,5047 доллара США) за кг хлопка-сырца, что может свидетельствовать о полном восстановлении по сравнению с сезоном 2020/21 года.

Cotton Production for West Africa

#### Прогнозы цен

Текущий прогноз Секретариата по среднесезонному индексу А на 2021/22 год составляет от 87 центов до 126 центов со средним значением 104,26 цента за фунт.
